Carpenters Local 237

Quality of craftsmanship throughout recorded history. Carpenters roots trace back to before Biblical times. Someone had to figure out how to build a structure when humans left the cave. Fortunately in the west central region of Illinois, for more than a century, the United Brotherhood of Carpenters and Joiners of America Local 237 have provided professional construction service as the members have created the 'look' of west central Illinois, as well as the panoramic skyline of Peoria and East Peoria along the Illinois River.

The professionals of Local 237 deliver value to the contractors and construction customers thanks to the outstanding Joint Apprentice Training Center (JATC). The Peoria-based college of carpenter knowledge serves the members, the signatory contractors and the construction customers of central Illinois well. Both the numerous aspects of the trade and advancements in technology require extensive knowledge in both geometry and algebra blended with exceptional tactile skills.

Knowing where and how to 'cut' and 'assemble' and then being able to cut and assemble are two separate skills. The signatory contractors and the construction customers can rely on the members of Local 237, who possess both the knowledge of *how* and the skills of *where and when* as they work with the latest processes, procedures and materials, to provide value.

Rob Swegle, training coordinator for the JATC, says, "We teach proper techniques and manufacturers' standards. And we don't stop at the apprentices. We also offer the journeymen an opportunity to come in for additional training and to upgrade their skills."

The Carpenters International union spends \$100+ million annually on training instructors, apprentices and journeymen at its 250 training sites around the United States. Structured on-site apprenticeship with an emphasis and focus of hands-on experience represents but one facet of training. Combined with classroom instruction, the comprehensive federal Bureau of Apprenticeship and Training certified apprenticeship program provides a working knowledge of the trade.

Architects and engineers now put certification of installers and others into their requirements. Thanks to the broad spectrum of training at the JATC, members of Local 237 bring various certifications to the job site. According to Swegle certification is emerging and will in the future go hand in hand with apprenticeship classes as more and more contractors will require employees to earn the specific certifications.

Swegle offers an example when he says, "The members take classes and then we test them so they earn certification in hardwood, tile, carpet and soft vinyl," adds, "the flooring manufacturers want that guarantee their products will be installed properly."

Local 237 members deliver the highest quality flooring, thanks to the Carpenter's INSTALL flooring program, certified by the International Standards and Training Alliance and endorsed by every major manufacturer. Thanks to this training, Local 237 members offer the only certified installation of flooring products in the west central Illinois region.

The JATC also teaches Local 237 members in the latest new technology and techniques such as insulated concrete, which has become quite popular as a building material in residential construction.

Health and safety also play a pivotal role as the members of Local

237 strive to achieve a safe work place. Apprentices and journeymen now need the OSHA class to get on job sites, and the JATC offers the classes for members. In addition to the personal OSHA 10-hour class, the instructors also teach proper processes of safety and the regulations including confined space, scaffolds, specialized materials, etc.

As a trade with numerous specializations—carpenters and joiners, millwrights, pile drivers, residential carpenters, interior systems, lathers and dry wall installers, cabinetmakers and millworkers and floor layers—the members of Local 237 deliver the value contractors and customers seek. No matter the specialization. The JATC has prepared and trained members for every known situation. In addition to years of field experience, the instructors regularly attend training themselves.

Local 237 members, the signatory contractors and construction customers of west central Illinois enjoy the wealth of knowledge and experience Swegle brings to the JATC. He serves on the curriculum committee for the Carpenter's 178,000 square foot national training center in Las Vegas. And he has served as a primary writer for several textbooks on Interior Systems used in the national curriculum by the entire union.

Done right the first time. The best value comes from experienced folks applying their acquired knowledge and skills. The contractors and customers know the best choice in west central Illinois, for their construction needs always includes the talent and skills of the members of Carpenters Local 237.
