OPERATING ENGINEERS LOCAL 649

Operating Engineers learn the skill set necessary to move mountains of earth, steel and any other

material that your project utilizes. For those who require exacting standards, the "Engineers" operate with the accuracy of surgical precision.

The total commitment to professional preparation and training provides the "Engineers" the excellence expected of professionals.

A combination of

classroom instruction, guided mentoring and in-the-field application creates the climate of higher education blended with practical application.

When contractors and customers need human hands coupled with the acquired expertise to move the earth with calculated mathematical precision, call on the members of the International Union of Operating Engineers Local 649. For 90+ years they have provided the very best professional skills available. Period.

The 127-acre Local 649 training site maintains a regiment of the latest in equipment and technology. A full-time Apprentice Coordinator joins with seven part-time instructors to make a notable nine-member team who earn the recognition of their peers. The International union recognized and honored the local training efforts by choosing to place Local 649 on its website as the very first spotlight training center.

Contractors, customers and clients can count on the members of Local 649 who spend four years as an apprentice learning the required skills to operate heavy equipment in construction. And the 144 annual classroom

hours coupled with a total of 6,000 hours of on-the-job training prepares them to deliver professional results whether they move dirt, lift and position

materials with a crane, operate industrial machinery or serve as skilled mechanics.

"Engineers" arrive on site first. Those who seek the proper elevations to begin the process of new construction know they can rely on the skills of Local 649, whose craft requires the precision to place all other crafts that follow in position to produce professional results.

The members of Local 649 translate work ethic and attitude into the utmost attention to detail, safety and customer service.

The extensive training regimen ensures apprentices get to the job site ready. And current experienced members come to the training center to upgrade their skills and learn new equipment.

Safety saves money. A safe work site helps create a productive work site. And reduces workers' compensation costs. The general president of the Operating Engineers has set the goal for every member who goes to work to go home that night to their families. Local 649 teaches and maintains a focus on safety. Members never do something unsafe.

The safety skills of Local 649 garner attention and acclaim as fire departments in central Illinois use the training site to conduct trench rescue training.

In addition to technical skills and hands-on expertise, the training center provides all apprentices a complete course in Union Heritage, in order to ensure the members of Local 649 understand the importance of the pride "Engineers" take in the trade and their skills. Plus to understand how the past helped shape today guarantees Local 649 will continue its legacy of excellence.

A dedication to ongoing training, safety and productivity ensures when developers and owners search for the highest quality and value they know

the members of Local 649 will move the earth to satisfy their needs.
